INTRODUCTION

The Energy Security Initiative was agreed upon by the Energy Working Group (EWG) at the EWG20 meeting held in Cusco, Peru (October 2000).

At EWG21, held in May 2001 in Malaysia, EWG members agreed that, "The intention of the [Energy Security] initiative was, and remains, firmly seated in information sharing on the many aspects that together contribute to greater energy security.

It was acknowledged that for many economies disruption to oil supply is the key concern and that the establishment of oil stocks by these economies may be an important policy option".

Therefore, the EWG21 meeting had resolved that an Energy Security Initiative workshop be held this year in Thailand. The output from this workshop will be considered during EWG22, including what will be presented to APEC Leaders.
